Experience

Software Engineer Jul. 2025 – Present
PBXFlex *Remote*

- Architected and led the decomposition of a monolithic backend into 6 independently deployable microservices, reducing deployment time by 84% (25 to 4 minutes) and request failure rates by 50% during peak traffic
- Led a 3-engineer modernization of a JavaScript backend to TypeScript, introducing reusable packages and targeted CI testing to reduce feature lead time by 60% (2.5 weeks to 1 week)
- Optimized GKE resource allocation by right-sizing Kubernetes pod CPU and memory requests and limits, improving infrastructure efficiency while maintaining 99.98% uptime

Software Engineering Intern Nov. 2023 – Feb. 2024
PBXFlex *Fullerton, CA*

- Owned full-stack development of user and organization management dashboards using TypeScript and Next.js, implementing billing, membership, resource management, and user settings
- Migrated authentication infrastructure from Keycloak to Auth.js, transferring existing user accounts from Keycloak's PostgreSQL database to an application-managed database

Project Management Intern Jun. 2023 – Apr. 2024
North Blue Networks *Fullerton, CA*

- Improved on-time sprint completion from 75% to 90% for a 5-engineer team by introducing sprint planning, biweekly stand-ups, and Kanban-based workflow tracking

Frontend Developer Oct. 2022 – Jun. 2024
Indian Wells Valley Youth Softball *Ridgecrest, CA*

- Architected and launched a league website using React and Next.js, increasing daily active users (DAU) 5× through SEO improvements and streamlined registration
- Integrated Square's payment API to digitize seasonal registration, eliminating paper forms and securely processing 120+ transactions

Projects

Shipd | TypeScript, React, Hono, Bun, PostgreSQL, Cloudflare Workers/KV/Queues, Docker Jul. 2026 – Present

- Architected and launched a production feature-flag platform with public TypeScript and Go SDKs, CLI, and MCP server; secured and onboarded its first paying customer
- Engineered offline-capable feature-flag SDKs with in-memory evaluation, achieving 12.49M evaluations/sec at 125 ns p99 latency in TypeScript benchmarks, with WebSocket/polling synchronization and resilient fallbacks
- Built authentication, RBAC, billing, and analytics; established CI/CD with 23 integration tests using Vitest and Testcontainers, deploying production services across Railway, Cloudflare, and Vercel

Education

California State University, Fullerton Fullerton, CA
B.S. in Computer Science *Aug. 2021 - May 2025*

Technical Skills

Languages: TypeScript, JavaScript, Go, Python, SQL
Frameworks & Libraries: Node.js, Bun, Hono, React, Next.js, FastAPI
Cloud & Infrastructure: AWS (S3, SES, RDS), GCP (GCS, GCR, GKE), Cloudflare Workers, Docker, Kubernetes, RabbitMQ
Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite
Developer Tools: GitHub Actions, GitHub Packages, npm
