## EXPERIENCE

---

### Software Engineer

Jul. 2025 – Present

*PBXFlex*

*Remote*

- Slashed feature development time by 60% (from 2.5 weeks to 1 week) by leading a team of 3 in migrating an Express.js backend to TypeScript
- Architected the decomposition of a monolithic backend into 5 core microservices, resulting in an 84% reduction in deployment times (from 25 to 4 minutes) and cutting the request drop rate by 50%
- Optimized GKE cluster efficiency by right-sizing pod resources to 0.2vCPU, balancing compute costs and maintaining 99% system uptime under high-usage scenarios

### Full-Stack Development Intern

Nov. 2023 – Feb. 2024

*PBXFlex*

*Fullerton, CA*

- Owned the fullstack development of the primary user and admin dashboard for a VoIP platform, building a feature-rich interface with TypeScript and Next.js to manage all user and organizational data
- Led end-to-end development of 7 new product features as a member of a 3-person Agile team, delivering 100% of product requirements ahead of schedule

### Project Management Intern

Jun. 2023 – Apr. 2024

*North Blue Networks*

*Fullerton, CA*

- Increased on-time completion of committed sprint work from 75% to 90% for a 5-developer team by introducing sprint planning, twice-weekly stand-ups, and Kanban-based workflow tracking

### Frontend Developer

Oct. 2022 – Jun. 2024

*Indian Wells Valley Youth Softball*

*Ridgecrest, CA*

- Drove a 5x increase in daily traffic by architecting and launching a new league website with React and Next.js, implementing SEO best practices to attract more registrations
- Digitized and automated the seasonal registration process by integrating a Square API payment gateway, eliminating mail-in forms and securely processing over 120 transactions

## PROJECTS

---

### Shipd | TypeScript, React, Hono, Bun, PostgreSQL, Cloudflare Workers/KV, Docker

Jul. 2026 – Present

- Architected and launched a production feature-flag service spanning 6 applications and 10 shared packages, including public TypeScript SDK and CLI packages; acquired and onboarded its first paying customer
- Designed a two-plane architecture that materializes PostgreSQL configuration in Cloudflare KV, enabling local flag evaluation without per-request network or database calls, propagating updates through WebSocket invalidation with a polling fallback
- Built authentication and RBAC, billing, and analytics, established CI/CD with 23 integration tests using Vitest and Testcontainers, then deployed and monitored 6 production services across Railway, Cloudflare, and Vercel

## EDUCATION

---

### California State University, Fullerton

Fullerton, CA

*B.S. in Computer Science*

*Aug. 2021 - May 2025*

## TECHNICAL SKILLS

---

**Languages:** TypeScript, JavaScript, Go, Python, SQL

**Frameworks & Runtimes:** React, Next.js, Node.js, Bun, Hono, FastAPI

**Cloud & Infrastructure:** AWS (S3, SES, RDS), GCP (GCS, GCR, GKE), Docker, Kubernetes, RabbitMQ

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, SQLite

**Developer Tools:** GitHub (Actions, GHCR, Packages), npm
